

Series EE savings bond at any time beginning twelve months after its issue date.

§ 351.7 May Series EE savings bonds be called for redemption prior to final maturity?

The Secretary of the Treasury may not call Series EE bonds for redemption prior to final maturity.

§ 351.8 When is interest payable on Series EE savings bonds?

Interest on a bond accrues and becomes part of the redemption value. Interest earnings are payable upon redemption.

§ 351.9 When will I receive the redemption value of my Series EE savings bonds?

(a) You will be paid the redemption value of your definitive bond when you surrender the bond for payment as provided in these regulations and in 31 CFR part 353.

(b) You will be paid the redemption value of your book-entry bond when it reaches final maturity, if you have not redeemed the bond previously.

§ 351.10 What do I need to know about market yields, or market bid yields, to understand redemption value calculations in this subpart?

We use market yields, or market bid yields, derived from Treasury bills, notes, and bonds, to create a yield curve based on the most actively traded Treasury securities. This curve relates the yield on a security to its time to maturity. Yields at particular points on the curve are referred to as "constant maturity yields" and are determined by the Treasury from this daily yield curve. Six-month and 5-year Treasury securities rates are derived from these yield curves.

§ 351.11 What do I need to know about the short-term savings bond rate, to understand redemption value calculations in this subpart?

We determine this rate by compiling 6-month Treasury securities rates as of the close of business for each day of the previous three months and calculating the monthly average for each month, rounding each monthly average to the nearest one-hundredth of one percent.

We then determine the short-term savings bond rate by taking 85 percent of the three-month average and rounding the result to the nearest one-hundredth of one percent. For bonds entitled to interest accruals at the short-term savings bond rate, that rate applies to the bond's first full semiannual interest accrual period following each announcement of the rate.

§ 351.12 What do I need to know about the long-term savings bond rate, to understand redemption value calculations in this subpart?

We determine this rate by compiling 5-year Treasury securities rates as of the close of business for each day of the previous six months and calculating the monthly average for each month, rounding each monthly average to the nearest one-hundredth of one percent. We then determine the long-term savings bond rate by taking 85 percent of the 6-month average and rounding the result to the nearest one-hundredth of one percent. For bonds entitled to interest accruals at the long-term savings bond rate, that rate applies to the bond's first full semiannual interest accrual period following each announcement of the rate.

§ 351.13 What do I need to know about the savings bond rate to understand redemption value calculations in this subpart?

We determine the savings bond rate by compiling 5-year Treasury securities yields as of the close of business for each day of the previous six months and calculating the monthly average to the nearest one-hundredth of one percent. We then determine the savings bonds rate by taking 90 percent of the 6-month average and rounding the result to the nearest one-hundredth of one percent.

§ 351.14 When are rate announcements that apply to Series EE savings bonds announced?

(a) The Secretary will furnish rates that apply to Series EE savings bonds in announcements published each May 1 and November 1.

(b) If the regularly scheduled date for the announcement is a day when we are not open for business, then the Secretary will make the announcement on

§ 351.15

the next business day. However, the effective date of the rate remains the first day of the month of the announcement.

(c) The Secretary may announce rates at any other time.

§ 351.15 Is the determination of the Secretary on rates and values final?

The Secretary's determination of rates of return and savings bond redemption values is final and conclusive.

§ 351.16 What do I need to know about the base denomination for redemption value calculations?

We base all calculations of interest on a unit with a principal amount of \$12.50. We use this unit value to determine the value of bonds in higher denominations. The effect of rounding off the value of the \$12.50 unit increases at higher denominations. This can work to your slight advantage or disadvantage, depending on whether the value is rounded up or down.

Issue dates—1st day of	Original term (in years)	First extended term (in years)	Second extended term (in years)	Final maturity dates
Jan. 1980–Oct. 1980	11	10	9	Jan. 2010–Oct. 2010.
Nov. 1980–Apr. 1981	9	10	11	Nov. 2010–Apr. 2011.
May 1981–Oct. 1982	8	10	12	May 2011–Oct. 2012.
Nov. 1982–Oct. 1986	10	10	10	Nov. 2012–Oct. 2016.
Nov. 1986–Feb. 1993	12	10	8	Nov. 2016–Feb. 2023.
Mar. 1993–Apr. 1995	18	10	2	Mar. 2023–Apr. 2025.

§ 351.20 What is the investment yield (interest) during the original maturity period of Series EE savings bonds with issue dates from January 1, 1980, through April 1, 1995?

The redemption value of a bond on a given interest accrual date during original maturity will be the higher of the value produced using the applicable guaranteed minimum investment yield or the value produced using the appropriate market-based variable investment yield.

(a) *Guaranteed minimum investment yield.* (1) *Bonds bearing issue dates prior to November 1, 1982.* You may obtain the guaranteed minimum investment yields on bonds bearing issue dates prior to November 1, 1982, by downloading from our website at

31 CFR Ch. II (7–1–04 Edition)

Example. The following hypothetical example illustrates the calculation: A rate of 3.25% will result in a newly purchased \$12.50 unit increasing in value after six months to \$12.70, when rounded to the nearest cent. Therefore, a \$5,000 definitive Series EE bond (with a principal amount of \$2,500) will be worth \$2,540 after six months (\$2,500 divided by \$12.50) \times \$12.70 = \$2,540.) In contrast, if applied directly to a \$2,500 principal amount, the rate would render a value of \$2,540.63 after six months, a difference of 63 cents. (This example does not account for any interest penalty that might apply if you redeem a bond less than five years after its issue date.)

§§ 351.17–351.18 [Reserved]

SERIES EE SAVINGS BONDS WITH ISSUE DATES PRIOR TO MAY 1, 1995

§ 351.19 What are maturity periods of Series EE savings bonds with issue dates prior to May 1, 1995?

Bonds with issue dates from January 1, 1980, through May 1, 1995 have an original maturity period and two extended maturity periods, as shown by the following table:

<www.savingsbonds.gov>, contacting us by email at <savbonds@bpd.treas.gov>, or by writing us at the following address: Bureau of the Public Debt, Parkersburg, West Virginia 26106–1328.

(2) *Bonds bearing issue dates of November 1, 1982, through April 1, 1995.* (i) *Prior to 5 years from issue date.* You may download the guaranteed minimum investment yields prior to 5 years from issue date at our website at <www.savingsbonds.gov>, by contacting us by email at <savbonds@bpd.treas.gov>, or writing to the following address: Bureau of the Public Debt, Parkersburg, West Virginia 26106–1328.

(ii) *On or after 5 years from issue date.* The guaranteed minimum investment yield of a bond from its issue date to
